Summary

Final-year Cybersecurity student and aspiring Full Stack Developer dedicated to building secure, high-performance web and mobile applications. Driven to combine a passion for software engineering with strong security principles, using logic and creativity to develop innovative, safeguarded technology solutions.

Education

Sri Lanka Technology Campus

Undergraduate

BSc (Hons) in Cyber Security

June 2022 - Present

<https://sltc.ac.lk/>

Skills

Frontend & Mobile

React, JavaScript, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Ant Design

State & Data

Redux, Axios, REST APIs

Backend & Databases

Node.js, Express.js, Python, MongoDB, Firebase, MySQL

Cybersecurity Tools

Burp Suite, Wireshark, Nmap, Maltego, Ettercap

Solidity

Smart Contracts, Ganache, Blockchain

Tools & Concepts

Git, GitHub, JWT, Machine Learning Integration

Projects

ML-Powered Job Recommendation System | Aug 2025 - Sep 2025

- Created a machine learning-based system designed to match users with highly relevant job opportunities.
- Structured the project with separate frontend and backend repositories for better code organization and scaling. Connected the web interface with the recommendation model to display accurate and personalized job results.

Technologies Used: React, Node.js, Express.js, Python, MongoDB

ACTIVE PLATE (Fitness and Nutrition Web App) | Jan 2024 - Feb 2024

- Developed a full-stack fitness and nutrition web application to help users track their daily health goals.
- Built the frontend and backend using the MERN stack to ensure smooth performance and a responsive design. Integrated Firebase to manage user authentication and store real-time database records securely.

Technologies Used: React, Express.js, Node.js, Firebase, Redux, Tailwind CSS

Timetable Scheduler Web Application | Dec 2024 - Jan 2025

- Designed a web-based scheduling application to help users organize their daily tasks and avoid time conflicts.
- Designed a user-friendly frontend interface that allows users to easily add, edit, and view their schedules.
- Implemented a reliable backend system to process scheduling logic and store timetable data safely.

Technologies Used: React, Node.js, Express.js, Tailwind CSS, MongoDB, Socket.io

Food Ordering Web Application | Nov 2023 - Dec 2023

- Implemented a complete food ordering web platform connecting customers with local menu options.
- Created standard e-commerce features for browsing items, managing a digital cart, and processing user orders.
- Built a responsive layout to ensure the application works perfectly on both desktop and mobile web browsers.

Technologies Used: React, Node.js, Express.js, Firebase, TailwindCSS, Redux

Attendance Recording Mobile App | Jan 2024 - Feb 2024

- Engineered a mobile application to digitize and speed up the daily attendance tracking process.
- Programmed the user interface with React Native to ensure a smooth experience across all mobile devices.
- Set up a secure database connection to record, store, and manage user attendance data efficiently.

Technologies Used: React Native, Node.js, MongoDB, Expo, Axios

Volunteer

ISACA SLTC Publicity Manager (Head)	Sep 2025 – Present
SEDS SLTC Satellite and IT Division (Editor)	Jun 2024 – Jun 2025
ISACA SLTC - ZERO-DAY Promotion and Marketing (Advisor)	Feb 2026 - Mar 2026

Certifications

<u>Python Programming</u> University of Moratuwa	2024	<u>Server-side Web Programming</u> University of Moratuwa	2024	<u>Front-End Web Development</u> University of Moratuwa	2025
<u>Software Quality Assurance</u> University of Moratuwa	2026	<u>Python for Beginners</u> University of Moratuwa	2025	<u>Web Design for Beginners</u> University of Moratuwa	2024
